## DETAILED ACTION

In view of the Appeal Brief filed on October 12, 2006, PROSECUTION IS HEREBY REOPENED. New grounds of rejection are set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

(1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,

(2) initiate a new appeal by filing a notice of appeal under 37 CFR 41.31 followed by an appeal brief under 37 CFR 41.37. The previously paid notice of appeal fee and appeal brief fee can be applied to the new appeal. If, however, the appeal fees set forth in 37 CFR 41.20 have been increased since they were previously paid, then appellant must pay the difference between the increased fees and the amount previously paid.

Applicant's arguments, with respect to the rejection(s) of claim(s) 1-6, 8, 9, 12, 15, 17-19, 21 and 24-25 under 102(b) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of McDonald et al. (6,090,136) in view of Staehle et al. (6,132,458), in regards to motivation. In regards to the Applicant's arguments "that one could imagine" the rolled stent of McDonald et al becoming stuck in the funnel device of Staehle et al., all that is required for a 103 rejection is a reasonable expectation of success. MPEP 716(C) states: The arguments of counsel cannot take the place of evidence in the record. Examples of attorney statements which are not

evidence and which must be supported by an appropriate affidavit or declaration include inoperability of the prior art.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-9, 12-22 and 24-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over McDonald et al. (6,090,136) in view of Staehle et al. (6,132,458). McDonald et al. discloses a device for delivering multiple self-expandable vascular stents (130) comprising a guidewire (110), a pusher (134) and a inferiorly loaded sheath (e.g. 126, 162) however McDonald et al. fails to disclose a loading capsule. Staehle et al. teaches a loading capsule (10) for releasably retaining a compressed stent. It would have been obvious to one of ordinary skill in the art to combine the teaching of a loading capsule, as taught by Staehle et al., to a device for delivering multiple self-expandable vascular stents as per McDonald et al., the motivation to combine being the stent within the capsule of Staehle et al. "would not be subjected to compression set due to compression for prolonged period of time" (col. 1, lines 10-15).

***Allowable Subject Matter***

Claims 10, 11 and 23 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
